## PROFESSIONAL SUMMARY

Senior QA Engineer / SDET-focused quality professional with 5+ years validating SaaS platforms, API-heavy integrations, and production-critical workflows for remote teams. Strong in risk-based test strategy, Playwright-oriented automation workflows, Postman API testing, regression planning, CI/CD quality practices, and early defect prevention. Experienced working with distributed teams and using Claude/Codex-assisted workflows to accelerate test design while keeping human ownership of test quality.

## CORE COMPETENCIES

SDET

Playwright

API Testing

Postman

Integration Testing

Regression Strategy

CI/CD Quality

Cross-Platform QA

AI-Assisted QA

## WORK EXPERIENCE

### NinjaOne

Jan 2023 - Present

#### QA Engineer | Remote

- Own QA activities for platform-level SaaS features and third-party integration workflows across enterprise ITSM/PSA service platforms.
- Design and execute functional, integration, regression, and cross-system test strategies for feature releases on roughly two-month cycles.
- Contribute early quality feedback by identifying risk areas, missing scenarios, edge cases, and regression impact before release.
- Use Postman to validate API behavior, payload handling, edge cases, and integration workflows across production-oriented scenarios.
- Configure Playwright test environments and use Claude to accelerate automation creation while reviewing, adapting, and validating the tests.
- Built local Claude-assisted QA tooling with MCPs, reusable skills, and structured prompts to improve test planning, environment context, and repeatable validation workflows.
- Partner with software engineers to clarify defects, reproduce issues, and improve release reliability across distributed teams.

### Producers National Corporation

Aug 2022 - Jan 2023

#### Quality Assurance Analyst

- Performed end-to-end quality validation for product changes, business workflows, and release-critical behavior.
- Improved defect detection through structured test design, clear documentation, and repeatable execution across manual and automated scopes.
- Collaborated with cross-functional teams to maintain release quality and align testing with business expectations.

### Citytech

Sep 2020 - Sep 2022

#### QA-QC

- Supported QA/QC processes across software delivery cycles, test execution, issue tracking, automation practice, and release validation.
- Used Selenium and Cypress across automation learning and QA practice, with current focus on Playwright-based workflows.
- Documented defects clearly and tracked resolution with engineering teams to reduce ambiguity and regressions.
- Contributed to process improvements that increased consistency in test coverage and QA execution.

### Pontificia Universidad Catolica del Ecuador

Jan 2020 - Mar 2021

#### Helpdesk Agent (Internship)

- Provided technical support and incident resolution in an academic IT environment, improving response quality and user support workflows.

## PROJECTS

### Medical Appointments Platform (Web + Native iOS)

Built and validated appointment scheduling workflows across web and native iOS, focusing on reliable user journeys, cross-platform behavior, and practical QA validation with Claude and Codex as implementation copilots.

### AI-Assisted Expense Tracking App

Built a mobile expense-tracking app using Expo and Supabase; implemented transaction capture, category tracking, cloud persistence, and QA cycles accelerated through AI-assisted workflows.

### Smart Pantry Expiration Monitor

Built a pantry inventory system with expiration tracking, Telegram notifications, web dashboard flows, and Gemini API workflows, emphasizing data handling and assistant-like output validation.

## EDUCATION

---

Engineering, Computational Science - [Pontificia Universidad Catolica del Ecuador](#)

Feb 2016 - Feb 2022

## CERTIFICATIONS

---

Object-Oriented Design - Coursera Apr 2026

Cypress: Modern Automation Testing from Scratch + Frameworks - Udemy Apr 2022

DevOps with Docker, Jenkins, Kubernetes, Git and GitFlow (CI/CD) - Udemy Jun 2022

Master Software Testing + Jira + Agile on Live App - Udemy Mar 2022

Git + GitHub Version Control - Udemy May 2021

## SKILLS

---

**QA:** Test Strategy, Test Automation, API Testing, Integration Testing, Regression Testing, Functional Testing, Defect Triage, SDLC

**Automation:** Playwright, Cypress, Selenium, AI-assisted test creation with Claude **API/CI:** Postman, Jira, Git, GitHub, Jenkins, Docker, Kubernetes, CI/CD

**Product:** SaaS Platforms, Cross-System Workflows, Mobile/Web Validation, Agile Collaboration

**Build/Cloud:** Supabase, Firebase, Expo, Flutter, React Native Workflows

**AI:** Claude, Codex, Gemini API, MCPs, reusable skills, structured prompts, AI-assisted QA workflows **Languages:** English, Spanish
